With two decades of experience in sourcing/procurement and food service industry Direct Source Procurement assists its customers in their sustainability efforts by identifying the most suitable source for their needs domestically or globally.

DSP's customized and result-oriented sourcing approach allows its customers to realize time and cost savings, increase profit margins while focusing on their core business. Regardless of its customers' location and product needs, DSP is large enough to source significant volume providing economies of scale and small enough to be flexible and adjust to its customers' needs timely and swiftly. With two decades of experience in sourcing and supply chain, Direct Source Procurement has become a unique and trusted advisor to its customers.
